About the Urban Bikeway Design Guide

The NACTO Urban Bikeway Design Guide is the go-to guide for cutting edge on-street bikeway design. It provides practitioners with state-of-the-practice solutions for on-street bikeways, based on lessons learned from the world’s best bicycling cities, both in the U.S. and beyond. Developed by bikeway design experts in cities like Houston, NYC, Portland, San Francisco, Chicago, Seattle, Washington DC, Austin, Atlanta, and LA, the Guide includes engineering drawings, three-dimensional renderings, case studies, research, and images. How do you turn this... ...into this?

Urban Bikeway Design Guide

HANDS-ON WORKSHOP

The City of Charlotte, in partnership with the Knight Foundation and NACTO, are pleased to offer this full day workshop focusing on innovative bikeway design. Learn how to tailor the most appropriate treatments for your community from the six sections in this revolutionary design guide:

- Cycle Tracks
- Intersection Treatments
- Signs
- Bike Lanes
- Bicycle Boulevards
- Signs and Markings

DATE
Thursday, October 9, 2014

TIME
9:00am to 3:30pm (Lunch Provided)

LOCATION
Charlotte Mecklenburg Government Center
Room 267
600 E. 4th St. Charlotte, NC

CONTACTS
Ben Miller - 704.432.1535
bgmiller@charlottenc.gov

Matthew Roe - 646.324.8352
matthew@nacto.org

REGISTER
Workshop Presenters

Matthew Roe is the Director of the Designing Cities Project at NACTO. His design and project management experience includes a wide range of urban street transformations, from bike lanes on neighborhood streets to BRT and LRT lines in developing cities to the Times Square pedestrian plazas. Matthew contributed to the NACTO Urban Street Design Guide and the NYC Street Design Manual.

Joe Gilpin is a Principal with Alta Planning + Design and leader of Alta’s national Engineering group. Joe was the project manager for development of the NACTO Urban Bikeway Design Guide. He has worked as a designer and planner on numerous bikeway and corridor projects throughout North America as well as the Middle East. Joe has a diverse background, including U.S. and international education in engineering and work in a national engineering consulting firm. He is one of North America’s foremost experts on innovative bikeway design.

Nick Falbo is a Senior Planner with Alta Planning + Design and was a key member of the team that developed the NACTO Urban Bikeway Design Guide. He specializes in the design and application of complete streets concepts for urban and rural roadways and understands how to balance the needs and safety of all transportation modes within a corridor. Nick is popularizing the Protected Intersections for Bicyclists design concept aimed at increasing the comfort and safety of cycle tracks at intersections, available at: http://www.protectedintersection.com/

PARTNERS/ SPONSORS

Presentation and materials provided by:
NACTO (National Association of City Transportation Officials), an association of 38 major cities formed to encourage the exchange of transportation ideas, insights, and practices while representing cities in key national transportation issues; and Alta Planning + Design, a national planning and design firm dedicated to active transportation.

Sponsorship funding provided by:
The Knight Foundation supports transformational ideas that promote quality journalism, advance media innovation, engage communities and foster the arts. They believe that democracy thrives when people and communities are informed and engaged. The Charlotte Department of Transportation is committed to enhancing the driving, bicycling and walking experience through planning, operating and maintaining the City’s transportation choices for residents and visitors. An important objective is to sustain, maintain and enhance the City’s transportation infrastructure.

Hosted by:
The City of Charlotte Department of Transportation.
