Jan Gehl; Foreword by Lord Richard Rogers
288 pages | 7.5 x 10 | 483 photos, 41 illustrations

For more than forty years Jan Gehl has helped to transform urban environments around the world based on his research into the ways people actually use—or could use—the spaces where they live and work. In this revolutionary book, Gehl presents his latest work creating (or recreating) cityscapes on a human scale. He clearly explains the methods and tools he uses to reconfigure unworkable cityscapes into the landscapes he believes they should be: cities for people.

Taking into account changing demographics and changing lifestyles, Gehl emphasizes four human issues that he sees as essential to successful city planning. He explains how to develop cities that are Lively, Safe, Sustainable, and Healthy.

Focusing on these issues leads Gehl to think of even the largest city on a very small scale. For bulk purchases, please contact Bulk Orders.

Chapter 1. The Human Dimension
- The human dimension
- First we shape the cities— and then they shape us
- The city as meeting place

Chapter 2. Senses and Scale
- Senses and scale
- Senses and communication
- The shattered scale

Chapter 3. A lively, safe sustainable and healthy city
- The lively city
- The safe city
- The sustainable city
- The healthy city

Chapter 4. The city at eye level
- The battle for quality is on the small scale
Chapter 5. Life, space, buildings- in that order

- The Brasilia Syndrome
- Life, space, buildings- in that order

Chapter 6. Developing cities

- Developing cities
- The human dimension- universal starting point
