

Sister Cities Bikeways Roadshow

NACTO and its Affiliate Members are proud to bring together city staff and advocates from around the Nashville region to explore common opportunities and challenges in bikeway implementation.

Over 48 hours, 20 participants shared their projects and lessons learned, toured bikeway projects in Nashville, took part in a street design charrette, and identified key city and regional needs. The small group size allowed for intimate discussions between attendees, fostering a network of peer cities facing similar challenges and opportunities.

- **Significant increase** in participant knowledge about **sponsor products and services!**

Participants' Comments

- ✓ Everything was excellent
- ✓ Exceeded expectations!
- ✓ Excellent job, well organized and a great mix of professional networking and experiencing the infrastructure!
- ✓ The biggest advantage/assets was the size (we all got to know each other pretty well), the proximity. Ease of travel cost, and getting out to see the facilities in a real city that has all kinds of mobility challenges.
