When Numbers Talk: Messaging Data to Your Audiences

Congestion Pricing in NYC

The
Summit
Foundation

P.03

01 The Context: Congestion Pricing in NYC

The Context: Congestion Pricing in NYC

After years of New York City subway delays and breakdowns, then-New York State Governor Andrew Cuomo announced the formation of the Fix NYC advisory panel.

The panel's findings included congestion pricing, which Gov. Cuomo then included in his 2019 state budget. That budget would need approval from the State Legislature.

Our task? Convince a majority of the 213-member New York State Legislature to support congestion pricing.

Congestion pricing was reasonably popular: 52%/39% in a January 2019 Siena Research Institute poll. But it was not popular among elected officials at the time.

P.05

02 Know Your Audience

Know Your Audience

Who Matters and Why?

Who Are Your Audiences?

An audience is:

- A **subset** of the general public
- Necessary to motivate to help you achieve your goals
- Are receptive to your messages

Things to Consider When Thinking About Audiences:

- Who influences your audience? How do you reach them?
- Multiple audiences? Tailor your message!
- Go to where your audience is to both reach them and shape who is a part of your audience.

P.07

03 Values and Frames

Values and Frames: The Theory of Mind Approach

- Theory of mind: others think differently than we do
- People don't view the world neutrally
- Frames are mental shortcuts that influence how we process data and complex issues
- We trigger frames through word choice, use of imagery, or speaker identity
- What do your audiences care about?

P.09

04 The Data: District Analyses

Tri-State Transportation Campaign's District Fact Sheets

Congestion Pricing District-Level Analysis

Senate District 11 – Queens County

Senator Tony Avella (D)

Impact on District Commuters

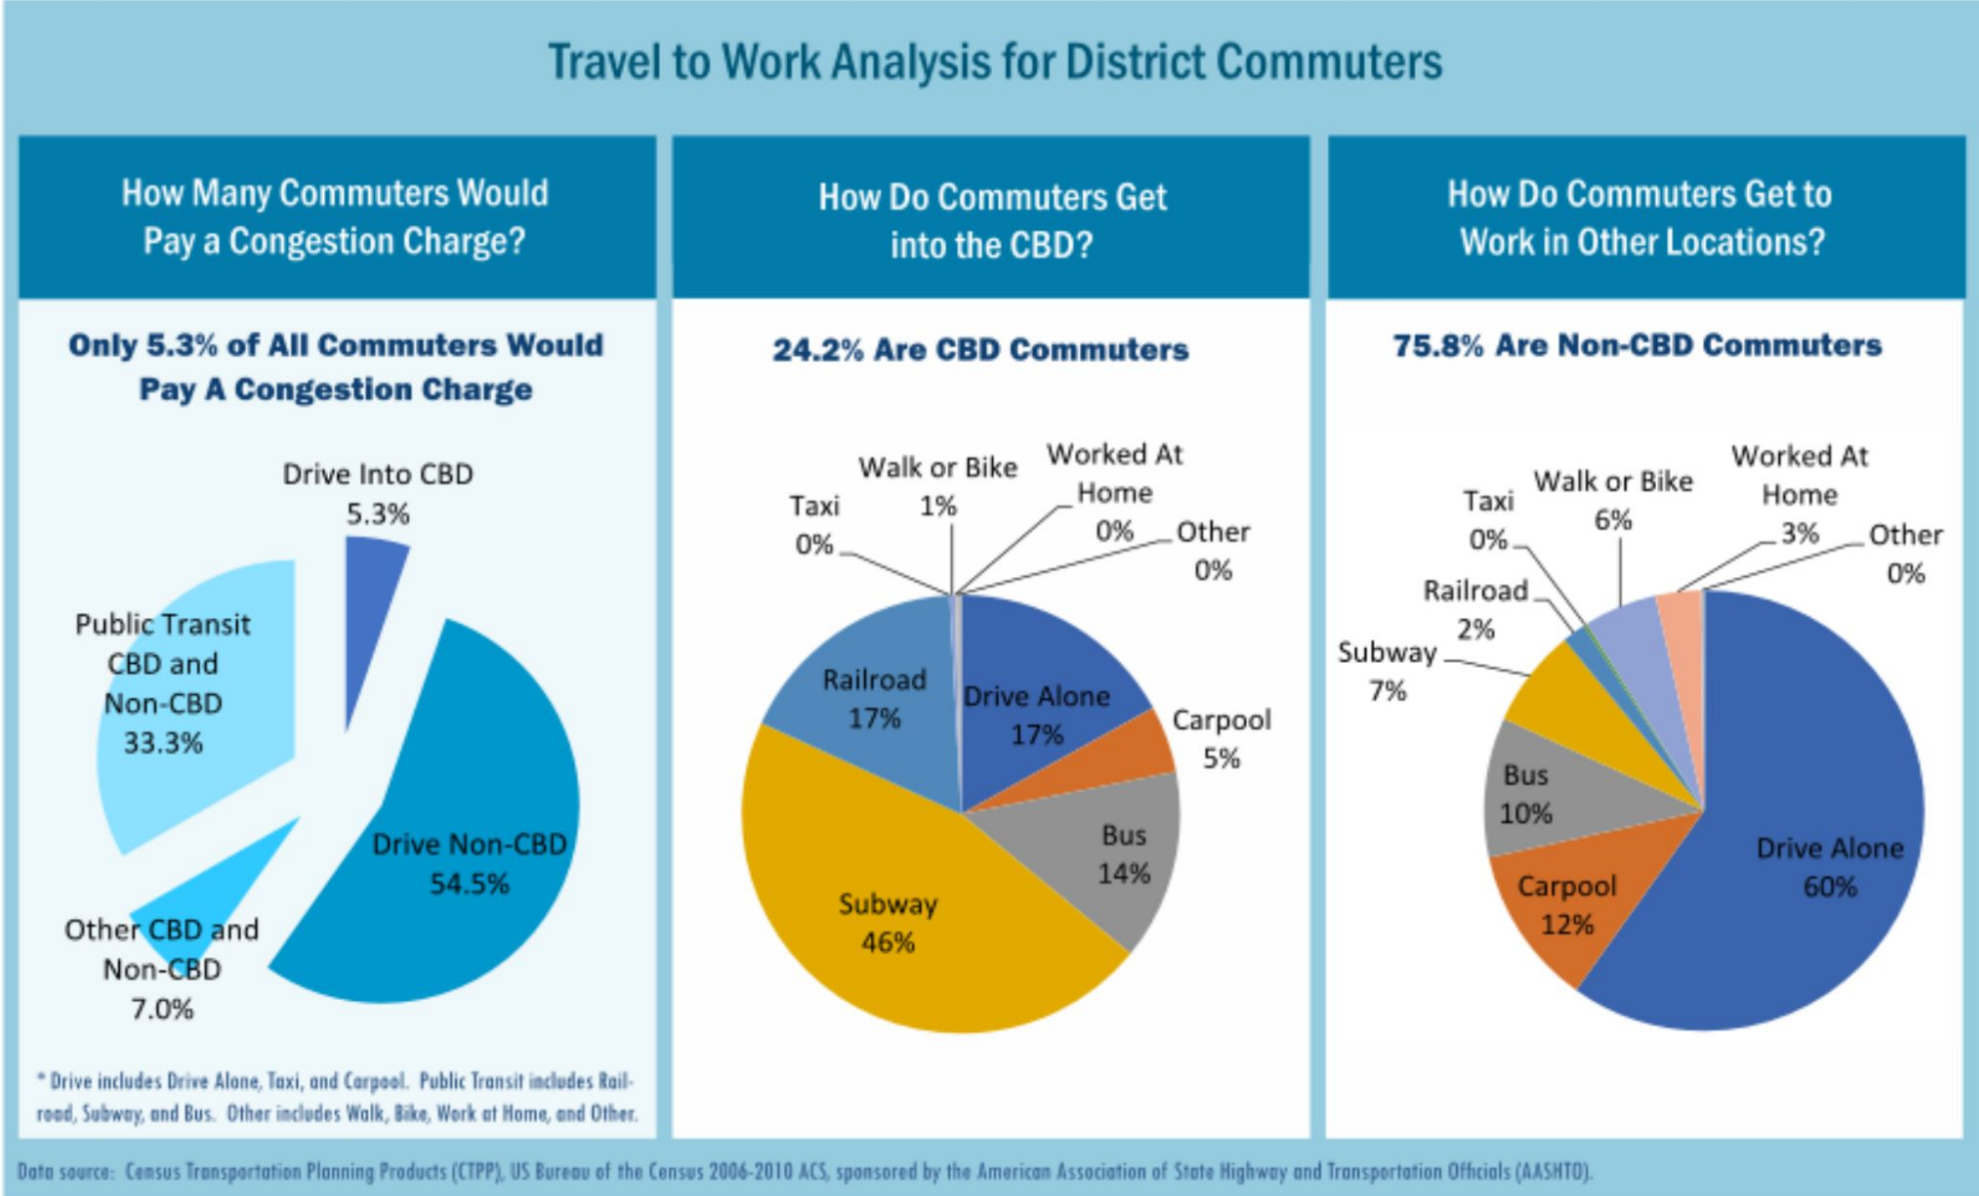

- **Only 5.3% of district commuters would pay a congestion charge** because they drive or take taxis into the central business district (CBD) of Manhattan below 60th Street.
- **33.3% of district commuters take public transit** and would benefit from increased funding for transit.
- **24.2% of district workers commute into the CBD and 75.8% do not commute into the CBD.**
- The district median income is \$43,277. Workers who drive alone have a higher median income than those who take public transit.

Median Income of Workers 16 Years and Older by Mode

05 Impact

Impact: Shifting the Narrative

Cities Look to New York to Lead the Way on Traffic Congestion

Andrew Cuomo is proposing fee on vehicles entering Manhattan's central business district to help fund faltering subway system

By Paul Berger [Follow](#)

March 27, 2018 5:30 am ET

Between 2013 and 2017 the number of for-hire vehicles in Manhattan's central business district more than doubled during the afternoon rush hour. PHOTO: DREW ANGERER/GETTY IMAGES

Congestion in the U.S.'s largest cities is only getting worse, and as municipal leaders search for solutions, the idea of charging vehicles to enter high-trafficked zones is gaining momentum.

MTA NYC TRANSPORTATION OPINION

Amid political bickering, a progressive solution to NYC's transit crisis waits in the wings

At its core, the current transit crisis is more regressive than any fee-based plan to solve it

Data Shows City Drivers Won't Face the Brunt of Congestion Fees

[Give this article](#) [Share](#) [Bookmark](#)

A task force has suggested charging drivers who enter Manhattan from 60th Street south to the Battery \$11.52 during peak commuting hours, while trucks would pay \$25.34. Passengers in for-hire vehicles would face extra fees of between \$2 and \$5. Todd Heisler/The New York Times

By Sarah Maslin Nir

Jan. 30, 2018

After a New York State task force unveiled its report to impose a charge on drivers in Manhattan's most congested neighborhoods, one main line of attack came from lawmakers and others who say that it penalizes drivers who live far from subway and bus stops and already pay tolls that help finance a public transit system they rarely use.

But on Tuesday a transportation research group is planning to release a report that seeks to challenge the weight of that argument. Using census data, the study by the Tri-State Transportation Campaign, which promotes a decreased reliance on vehicles, analyzed commuting patterns in every State Senate and

Our next steps

The reforms presented in this report are just the beginning of our effort to better promote equity within our work. Achieving our equity goals will require sustained effort and commitment by the City, our public agency partners, and our community to implement systemic changes in transportation planning and engineering, law enforcement, and traffic safety culture. Transportation & Public Works will be working on the following items in the coming months:

- Further equity analysis on specific locations where we are considering safety investments or initiatives;
- Refine and implement changes to prioritization methodologies;
- Evaluate the impacts of our investments on communities of color;
- Participate in community conversations around systemic changes needed to promote equitable traffic enforcement.
- Continue to engage with TxDOT in ongoing conversations around the I-35 Capital Express project and support the Our Future 35 initiative to ensure that the reconstruction of I-35 accounts for the impacts that the highway has had on communities of color and seeks to address community concerns about equity, safety and mobility.

Our Key Takeaways

- **Think about internal audiences**
- **Data points are real people**
- **Storytelling to inspire bold action**

- Express Service
- End of route
- Route continues at lower frequency

0 1 2 3 4 5 miles

BETTER BUS NETWORK

- 2018 - First community-led full network redesign
- No major changes since start of rail in 1986
- Re-imagined bus network
 - Increased access to frequent bus routes
 - Improved off-peak service
 - Faster journeys
- 2020 – Developed a pre-COVID cost-neutral plan
- 2021 – Approved a 9 per cent increase plan
 - (~\$27M annualized costs)

HISTORICAL CONTEXT

Surtax Skepticism – People’s Transportation Plan 2002

Degradation of public trust

Budget constraints and service/quality cuts

Worsening congestion with rapid population growth

Local advocates taking the initial project lead

WHAT'S THE STORY?

Where the Jobs Are: Employer Access to Labor by Transit

Metropolitan Policy Program
BROOKINGS

Miami-Fort Lauderdale-Pompano Beach, FL Metro Area

Why Transit Access Matters

The suburbanization of jobs obstructs transit's ability to connect workers to opportunity and jobs to local labor pools. As metro leaders continue to grapple with limited financial resources, it is critical for transit investment decisions to simultaneously address suburban coverage gaps as well as disconnected neighborhoods.

For more information, read the full report at brookings.edu/transitandlabor or email rharvey@brookings.edu.

Transit Coverage in Miami

The share of jobs in the metropolitan area that are in neighborhoods with public transit service.

ENTIRE METRO AREA

WHY FOCUS ON BUS SERVICE?

4 out of 5
passengers are
riding the bus*

* when considering only Metrobus and Metrorail services

AUDIENCE

13 County Commissioners – low transit knowledge

Strong Operator Union – high transit knowledge

Local Residents – transit knowledge specific to them

WHAT'S THE PROBLEM?

EXISTING NETWORK

- From the 1980s
- Confusing
- Duplicative
- Unreliable
- Slow

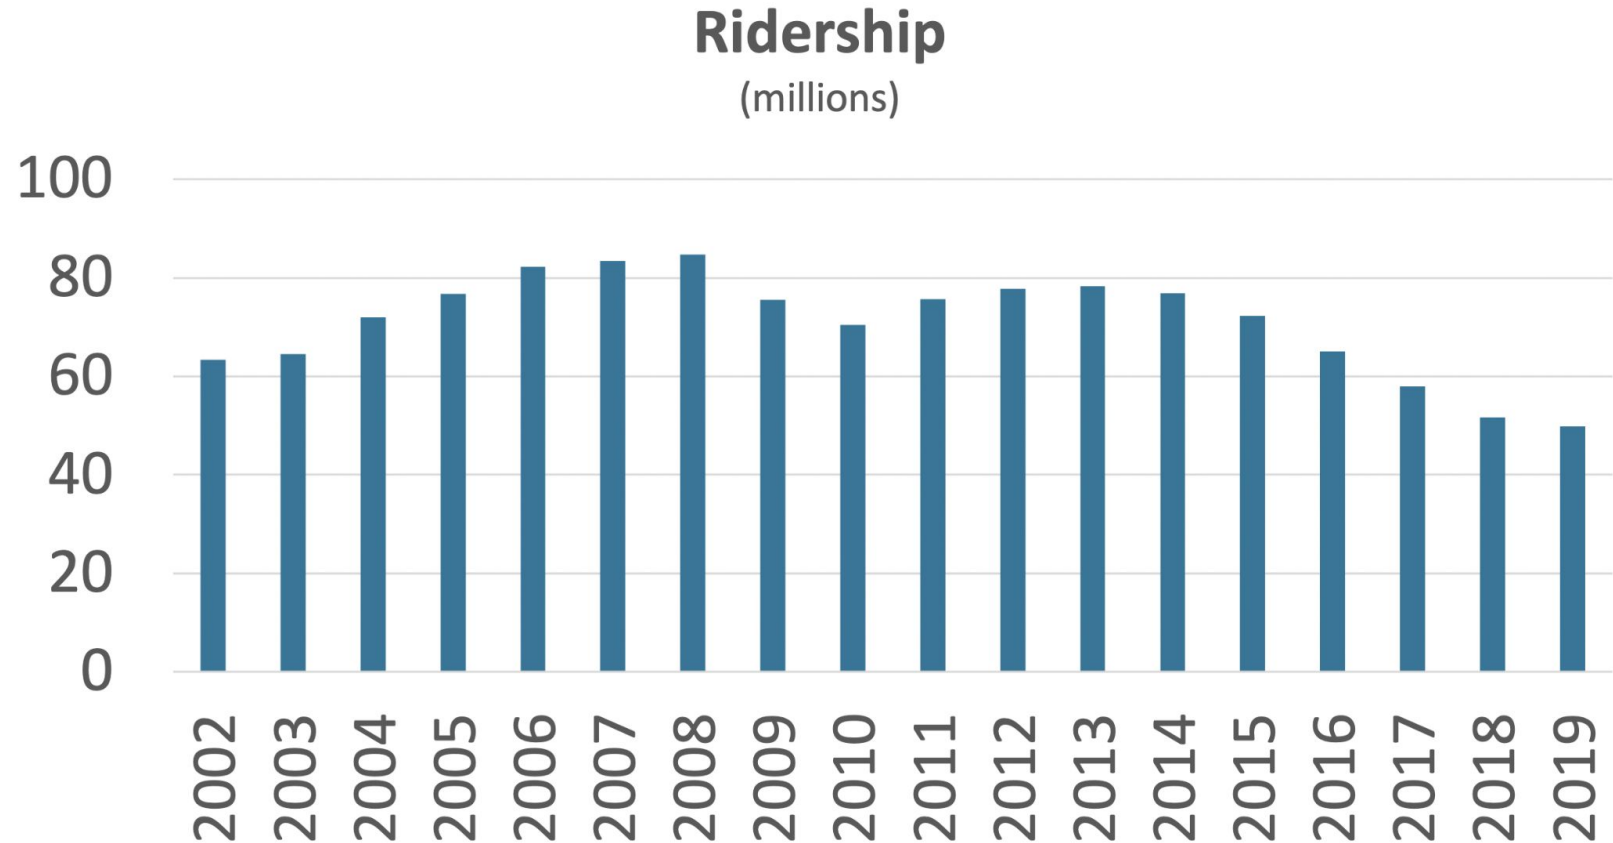

WHAT'S THE PROBLEM?

Top 15 bus routes combined carry 50% of the overall ridership

WHAT'S THE PROBLEM?

- No major changes since start of metrorail in 1986
- County's population grew nearly 75%

HOW DID WE GET HERE?

- Lowest level of service hours since 2002
- Better Bus Network brings us back to around 2015 levels

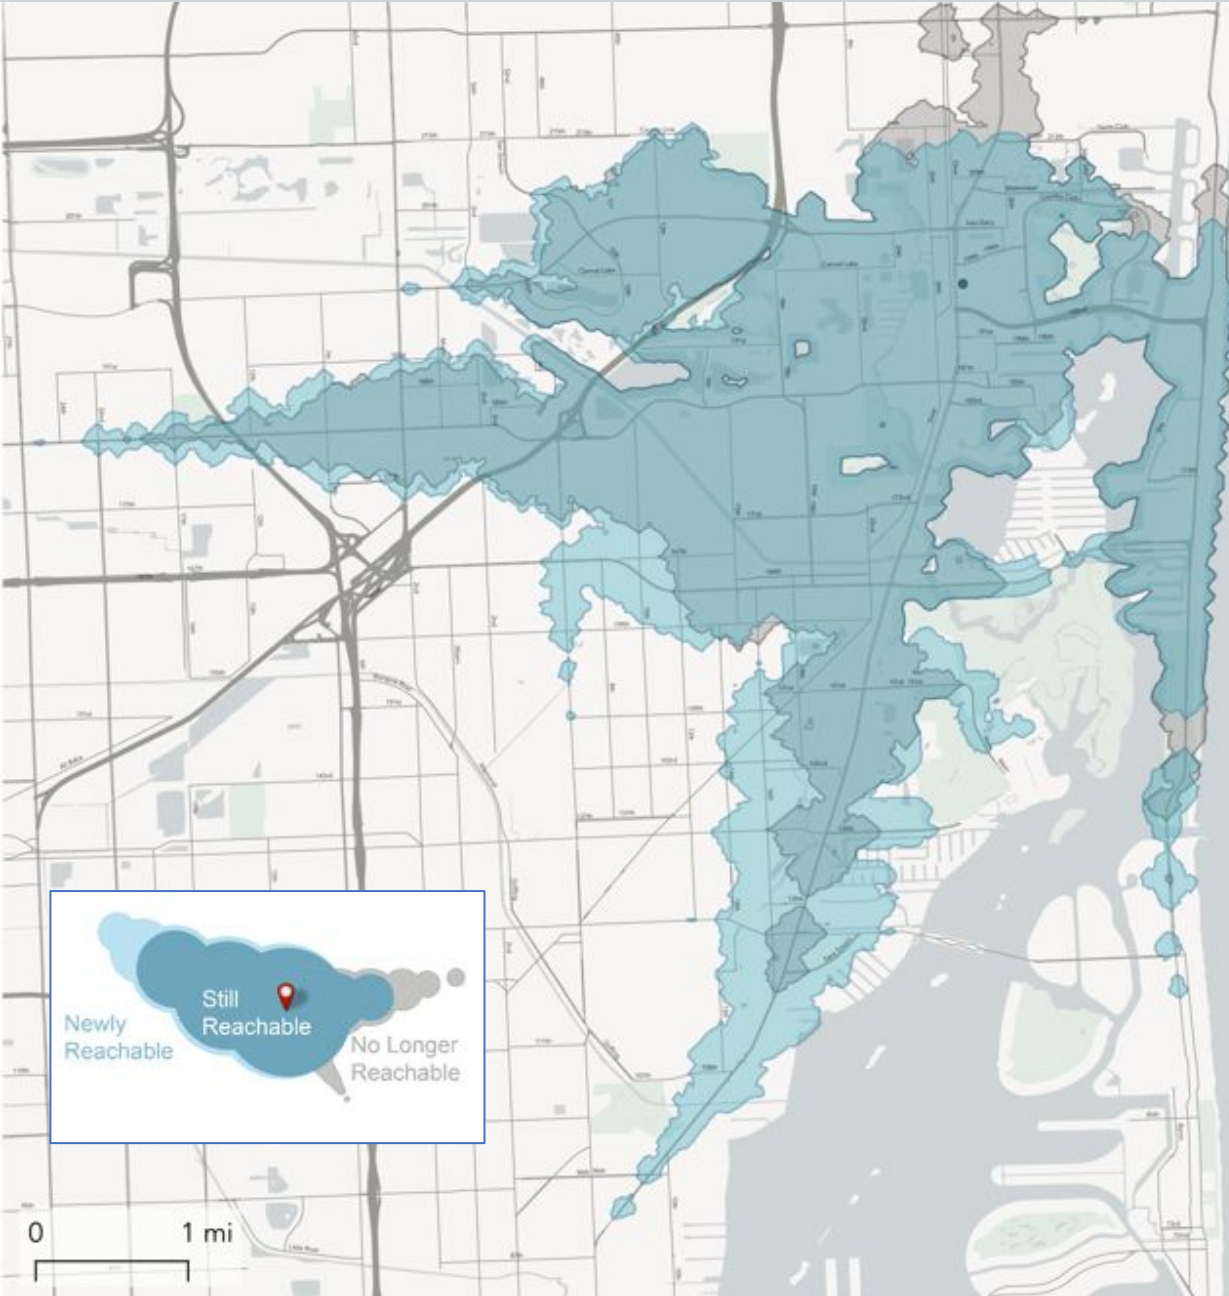

Annualized Revenue Hours (millions)

WHAT ARE THE BENEFITS?

- Connects residents to more opportunities
 - > 30% more in 60 minutes transit and walk travel time
- Provides consistent high-frequent service
 - Major corridors 6am-10pm
- Creates a more efficient system
 - ~10% of our service is duplication
- Provides greater access to high frequent routes
 - > 350,000 residents from 10% today to 23%
- Creates more equitable service
 - Greater accessibility gains in minority and low-income areas

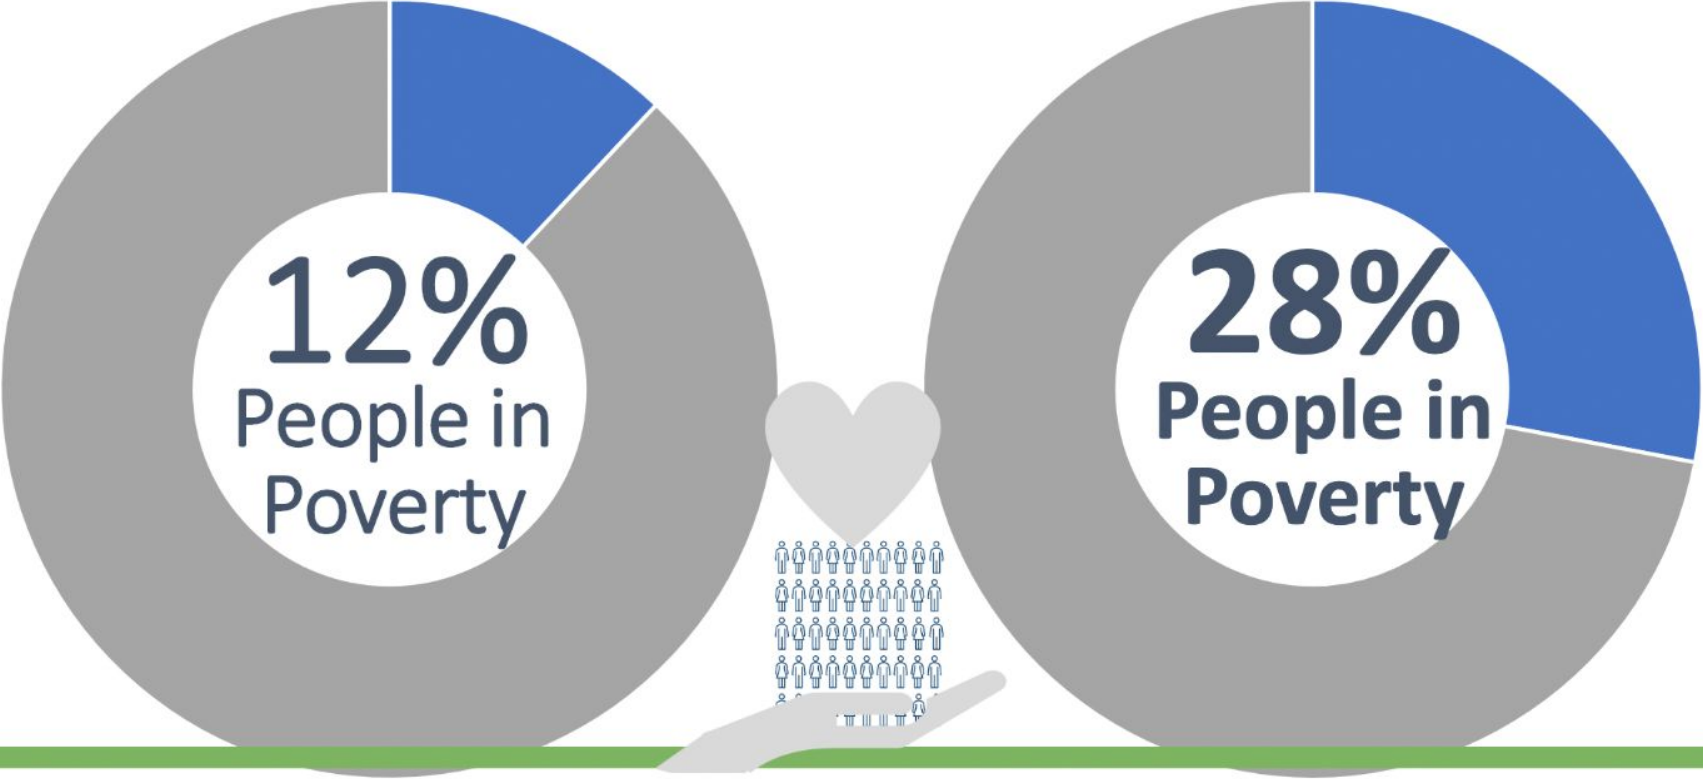

ACCESSIBILITY

How far can I travel in
45 minutes from
Aventura Mall at noon?

Reaching:
15% more jobs
20% more residents

WHO HAS ACCESS TO HIGH FREQUENT SERVICE?

Existing

5 minute walk

Proposed

49 out of every
50 will have same
or better transit
service

KEY TAKEAWAYS

- Clearly identify the problem/story hook
- Mea Culpas are healing, and deflecting
- Consider your audience's knowledge/interest levels
- Transparency builds trust

A vibrant outdoor market scene, likely in an urban area like Chinatown in New York City. The street is lined with vendors selling fresh produce, including cabbages, melons, and other vegetables. Shoppers are seen browsing and carrying bags. Colorful striped umbrellas provide shade for the stalls. In the background, multi-story buildings with various signs, including one for a language school, are visible. A construction crane is also present in the distance.

A Full Story Summary

Setting the
Stage

Project Overview

Background

- The Pedestrian Unit identified Canal St as a priority area in need of sidewalk and safety improvements but wanted to see what members of the community identified as issues and challenges.
- Canal St handles high volumes of pedestrian traffic on narrow sidewalks especially throughout the Chinatown area, which is a popular New York City destination.
- Canal St has large vehicle lanes that use up the majority of the street space in this area.
- Vehicles use this street to reach both the Manhattan Bridge and Holland Tunnel.
- Trucks travel both through Canal St, as well as to destinations along the corridor to unload goods to many local merchants.

A Street Ambassador and an interpreter speak to a participant on Canal St.

Outreach Overview

Purpose

- To understand what pedestrian and safety improvements the community would like to see.

Outcomes

- Project Managers will be able to identify intersections that are traffic safety concerns to the community.
- Project Managers will be able to identify pedestrian needs and concerns.
- Project Managers will understand how pedestrians get around, including if they use mobility devices.

Process

- The Street Ambassadors facilitated a Merchant Survey with businesses along the corridor.
- Pop-up outreach stations were set-up at sites along the project corridor.
- Boards were set-up to show survey participants visuals of examples of safety improvements.
- Palm cards were distributed with the survey link available in English, Chinese and Spanish
- The Street Ambassadors coordinated with the Chinatown BID to further circulate the survey within the community.

An Ambassador conducts an Intercept Survey on Canal St and Baxter St.

Two ambassadors conduct separate Intercept Surveys on Canal St and Baxter St.

Social Media Coverage

DOT's Social Media Strategy

- In coordination with DOT's Press Office, we distributed the survey along with some language to encourage viewers to participate.
- The survey was featured on both the agency's Twitter and Facebook accounts.

Facebook Impressions

DOT's Press Office posted on Facebook on an almost weekly basis. Listed impressions are the number of times content entered a person's screen.

Below are the total impressions for each posting.

- Friday 7/8 at 4:15PM: 4,973
- Thursday 7/14 at 2:47PM: 2,836

Baseline Data: Trip Purpose

Brief Highlights

How do people get around in the neighborhood?

- » Most respondents reported walking as their preferred mode of transportation for accessing their selected activities on Canal St, while fewer participants indicated driving alone as their typical mode of transportation.
- » Respondents reported using public transit often for work (20%), visiting friends and family (23%), and going to restaurants/bars/social venues (38%), emphasizing its importance for commuting, socializing, and accessing goods and services.

» Based on the experiences reported, driving alone is not commonly used for most activities on Canal St. However, a few respondents

When Numbers Talk: Using Data to Tell Stories and Make the Case

Amanda Stout, AICP
Deputy Chief Project Delivery Officer
District Department of Transportation (DDOT)
NACTO 2023

Our Mission

The District Department of Transportation's mission is to equitably deliver a safe, sustainable and reliable multimodal transportation network for all residents and visitors of the District of Columbia.

The District of Columbia has a Vision Zero goal

d. Vision Zero DC Overview 2022 Update Safety Grants Engineering Crash Analysis Education Get Involved

Vision Zero DC
Everyone deserves safer streets.

VISION Z=RO 2022 UPDATE

SAFE STREETS FOR WASHINGTON, DC

District of Columbia Mayor Muriel Bowser launched Vision Zero in 2015 to inspire and transform DC's roadway safety efforts, and set our sights on a goal of zero fatalities or serious injuries on our streets. Since then, the District Department of Transportation (DDOT) has shifted to designing streets that are safe for everyone, working closely with community members to identify problems and build solutions.

<https://visionzero.dc.gov>

October 2022

WE ARE WASHINGTON GOVERNMENT OF THE DISTRICT OF COLUMBIA
DC MURIEL BOWSER, MAYOR

...and it is challenging.

In 2022:

- **35 people died in or from crashes**
 - 19 people were pedestrians
 - 3 people were killed while they were biking
 - 2/3 cyclists killed by right turning large trucks on green
- **307 people suffered major injuries including:**
 - 146 People driving
 - 40 people inside the vehicle
 - 86 people walking
 - 23 people biking

How can data help us achieve our safety goals?

- Big goal = make our streets safer for all
- Show our progress and better tell our story
 - to internal DDOT teams
 - to residents
 - to the Mayor's Office and Council
 - to the media
- Effectively advocate for more funding for our transportation infrastructure projects
 - Competing against other local funding priorities
 - Opportunity of the Bipartisan Infrastructure Legislation (BIL)

DDOT Paving Plan

Next Steps and Challenges

- DDOT has identified a High-Injury Network (HIN) comprised of 29 corridors.
- How to communicate progress on bigger, long-term capital projects in a comprehensive and coordinated fashion (not just individual project websites)
- How can we more effectively use dashboards and data to communicate both internally and externally how we are planning, prioritizing, funding, and implementing safety projects?
- Challenge and opportunity presented by new BIL funding

Strategies and Considerations

Different programs and projects require different methods of presenting information.

- **Past-looking vs. future-looking** (What we have accomplished/built vs. a plan for future work)
- **Reactive projects vs. proactive projects** (The importance of “closing out” requests)
- **More nimble and tactical projects** (show results faster) **vs.** **progress on longer-term capital infrastructure projects**

Thank you!
